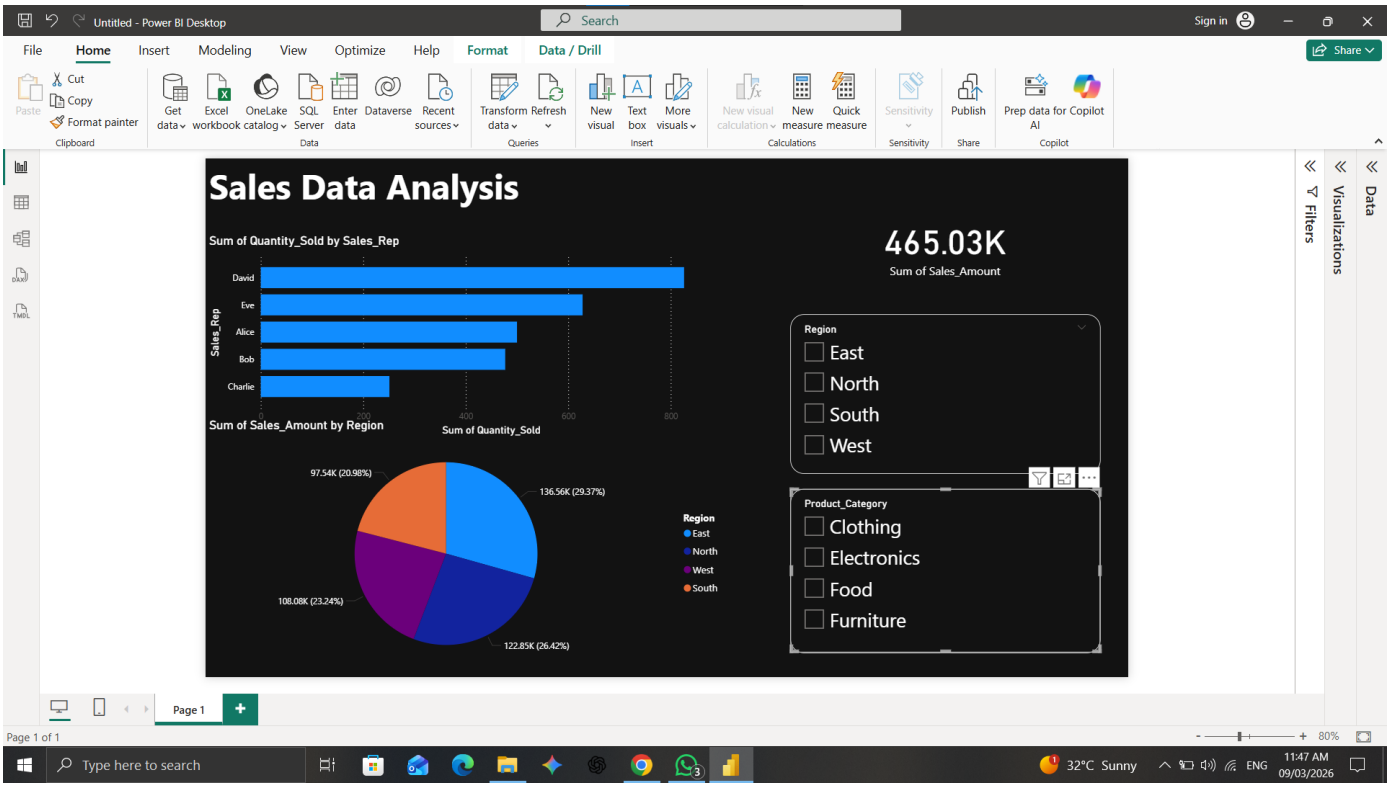
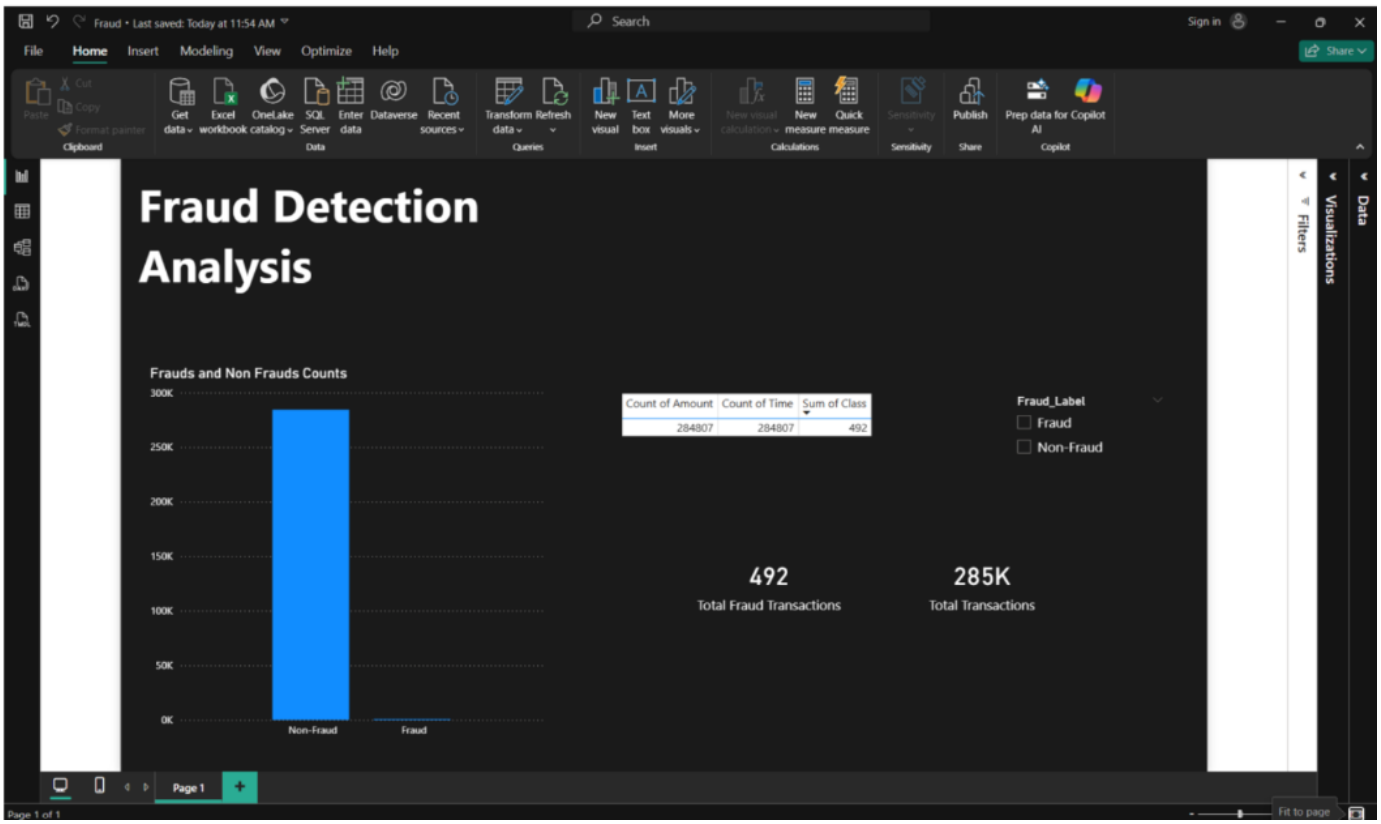
Assignment-5





Sales Data Analysis – Insights

- The **Eldon File Cart** and **Rogers File Cart** products generate the **highest sales**, indicating strong demand.
- The **Central region contributes the largest share of total sales**, followed by South and North.
- Some products like **Index Tabs and Sharpeners show very low sales**, suggesting weaker demand.
- Regional and product-based insights help businesses **optimize inventory and focus on high-performing products**.

Fraud Detection Analysis – Insights

- The dataset contains around **285K transactions**, but only **492 are fraudulent**, showing that fraud cases are **very rare**.
- The visualization highlights a **strong imbalance between fraud and non-fraud transactions**.
- Such imbalance makes fraud detection **challenging and requires specialized detection techniques**.
- Monitoring transaction patterns helps organizations **detect suspicious activity and reduce financial losses**.
